Definitions:

Household: A household or family is defined as a group of related or unrelated individuals who are living as one economic unit.

Income: Income is the money received by any member of the household before such deductions as taxes and Social Security. It includes the following: salary or wages; earnings from self-employment, including fishing and farming; welfare and unemployment; child support and alimony; strike benefits; Social Security, pensions, retirement and disability payments; Permanent Fund Dividends (PFDs), and other cash income received or withdrawn from any source which would be available for payment of a participant’s meal. Supplemental Nutrition Assistance program (SNAP) benefits are not included.

Current income is determined by the income received by all members of the household during the month prior to application. But if this income was much higher or lower than usual, the expected income for this year (12 months starting from the month prior to application) should be used. For example, self-employed people such as fishermen and farmers should use yearly income.
